Very fun

Calm, good educational game for your kids, very relaxing and slow paced, good for stressful days.

Recommended for parents who want their children to have a learning tool that they can use while out of school.. absolutely brutal, crazy imagery, but **FAQING STELLAR!!** so simple, easy controls, but overall great!. Imagine if DOOM was made by a guy who was into ambient drone music.. top 10 depictions of hell in videogames. Psychodelic, Lovecraftian, Ultra-Hard, Nightmarish, Surreal, DMT, Occult, inhuman Arcade.

The main goal is to survive in hell as much as possible while you try to beat other scores.

As hard as addictive,
